Summary

Full-stack developer who builds fast, reliable web apps with TypeScript, Golang, React, and Next.js. I enjoy system design and turning ideas into clean, working products end to end.

Education

Bachelor of Technology (B.Tech)

LNCT College of Technology, Bhopal

📅 2021–2025

📍 Bhopal, Madhya Pradesh, India

Experience

Full Stack Developer

HaulDrive

📅 December 2025 – April 2026

📍 Remote London U.K.

- Worked on HaulDrive, a fleet management platform for tracking vehicles, drivers, and hauling operations.
- Redesigned both the frontend and backend, improving architecture, scalability, and maintainability.
- Built the Jobs module to create, assign, and track hauling jobs across the fleet.
- Implemented Operating Licenses management for compliance and vehicle authorization tracking.
- Designed a central RBAC system for fine-grained, role-based access control across the platform.

Skills

- **Programming Languages:** TypeScript, JavaScript, Python, Golang, C++
- **Frameworks & Libraries:** Next.js, React, Node.js, Express, Socket.IO, Tailwind CSS, Prisma, Drizzle ORM, Gin, NestJS, FastAPI, Vue.js
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **Tools & Platforms:** Git, Docker, Linux, Vercel, AWS S3, AWS EC2, Kubernetes, CI/CD, GitHub Actions, RabbitMQ
- **Concepts:** REST APIs, WebSockets, WebAssembly, Microservices, Agile, Object-Oriented Programming, System Design

Projects

Hauldrive-Fleet Management *Next.js, Golang, Gin, PostgreSQL, Redis, TypeScript, Docker*

📅 2025–2026

- Built a fleet management platform to track vehicles and drivers in real time, with dispatch and route scheduling for hauling operations.
- Engineered Go (Gin) REST APIs backed by PostgreSQL, using Redis for caching and live location updates to cut read latency.
- Implemented maintenance and telemetry tracking (fuel, service logs) with operational dashboards and reporting for fleet-wide visibility.

Finalist *Next.js, DiscordJS, Docker, Redis, Postgres, Golang, Gin, AWS S3, TypeScript, REST API [Github]*

📅 2026

- Built a configurable scrim management platform with customizable slot systems, serving gaming communities via Discord.
- Designed persistent data layer using PostgreSQL and Redis for tracking scrim history, team data, and player participation.
- Implemented automatic slot assignment with substitution and waitlist support, reducing manual coordination effort.

Chai-lang *Golang, WebAssembly, React, Tailwind CSS, TypeScript [Github]*

📅 2025

- Designed and developed a programming language from scratch in Go, implementing lexer, parser, and code generator.
- Engineered the compiler to target WebAssembly, enabling client-side code execution in browsers with a React frontend.

sm-go-next *Next.js, Golang, Socket.IO, Drizzle, Cloudinary, Tailwind CSS, TypeScript [Github]* **[In Progress]**

📅 2025

- Developed a full-stack social media platform with real-time messaging and live content updates using Socket.IO.
- Architected a scalable monorepo with end-to-end TypeScript type safety across frontend and backend services.

Shrinkr *Next.js, Golang, Zod, Tailwind, Postgres, TypeScript, Docker [Github]*

📅 2025

- Built a full-stack URL shortener with custom back-half support, QR code generation, and link analytics.
- Integrated Stripe for payments and React Charts for traffic visualization; containerized with Docker.
